

## Hruska Clinic and PRI host visitors from Japan

Posted on 01/30/2018

I am Akira Yoshimoto from Japan.

I participated in the mentorship program on January 20, 2018.

I had been waiting for this opportunity so long.

I treat mainly sports injuries for junior, elite and professional athletes in my office with acupuncture, micro current modality and PRI.

I wanted to see how the Hruska Clinic staff used PRI technique in actual practice.

I saw the immediate change of a patient's movement and behavior with each treatment technique.

I will never forget the patients faces brightened up after a treatment session.

I will learn more the essence of PRI and will definitely come back here.

Thank you very much for all your welcome support.
